When you have an idea to share, Screencast it.

Record , trim, share, and view transcribed screencasts with the Screencast app on Chrome OS – and create a custom library of videos automatically saved in Google Drive.

Enhance instruction

Easily record lessons, narrate your own videos, and enhance them by adding screenshots, trimming text, and handwriting notes using a touchscreen or stylus.

Access videos in one place

Just open your Chromebook* to get started with Screencast. When you finish recording, your video is automatically uploaded to Google Drive for easy sharing.

Create more inclusive learning

Make it possible for all learners to participate with real-time speech-to-text transcriptions and the ability to translate into their native language.

"It's been inspiring to see what the kids have done with Screencast. For one assignment, I had my students pursue a passion project and make a presentation to share. They were beyond proud. They just lit up – all they needed were tools to write the slide and then record their voice over it. It was just super empowering for them."

– Tara Wolfanger, Fifth grade teacher, Mohonasen Central School District, Rotterdam, NY

Learn more about solutions for Educators

* The Screencast application comes installed on Chromebooks M103 and higher.

Google for Education

Show, tell, and share it with your class.

For educators

Enhance instruction and create a more interactive classroom with intuitive screencasting tools.

- Write on the video with a touchscreen or stylus to highlight key concepts
- Record and transcribe your lesson or demo in one click
- Trim your recorded video content by simply skipping over captions
- Automatically upload videos to Google Drive when you stop recording
- Share videos without taking up local storage space on your device

For students

Empower students to share their ideas with screencasting tools and take learning beyond the classroom with a library of video lessons.

- Help students express their ideas by narrating and recording video reports
- Make lessons available in Google Drive so students can watch from home
- Open a video, search by keyword, and replay a section for homework help
- Translate video captions into students' native languages in real time
- Offer students the same tools you use, like annotation and text trimming

Get creative with Screencast

⌂ Ignite learning from home

Record screencasts while teaching so students can watch when they missed class, need to review a tough concept, or are studying for a test.

◉ Flip your classroom

Create a video lesson in advance and assign students to watch it for homework. Then, use class time to practice what was taught together.

Better together

Screencast and **cast moderator** work together seamlessly to let educators and students wirelessly share their screens right from their Chromebooks as they record – with robust moderation features for educators. Control who's presenting to the big screen and turn off screencasting with the click of your remote. Learn more about cast moderator.
